Education

University of Illinois Urbana-Champaign — Champaign, IL
Bachelor of Science in Computer Science — *Expected May 2029*

Cupertino High School — Cupertino, CA
High School Diploma | GPA: 4.0/4.0 — *June 2026*

Experience

Founding Software Engineer — Feb 2025 – Jul 2026
YearbookPro - Startup — *Cupertino, CA*

- Developed the initial production platform for a digital and interactive yearbook SaaS product adopted by paying K–12 school clients
- Built and maintained backend services in Python and FastAPI, implementing separate admin, user, and content APIs for authentication, content management, and platform operations
- Architected backend infrastructure using PostgreSQL, Redis, RabbitMQ, Typesense, AWS S3, and NGINX to support data persistence, caching, asynchronous processing, search indexing, file delivery, and request routing
- Developed the frontend application with SvelteKit and TypeScript, implementing type-safe server actions and validating data across client- and server-side workflows

Full-Stack Software Engineer — Oct 2023 – Present
Artify4Kids - Nonprofit — *San Jose, CA*

- Independently designed, developed, and deployed the organization's full-stack web platform using SvelteKit and JavaScript
- Implemented server-side APIs and a Cloudflare R2-backed photo gallery, enabling event photography to be uploaded and delivered immediately from the cloud
- Owned end-to-end product execution across information architecture, UI/UX design, frontend development, backend development, and deployment
- Improved SEO and organic discoverability, helping the platform reach 1,000+ monthly active users and 100,000+ annual page views

Personal Projects

Tino Lockers | *TypeScript, SvelteKit, Zod, Drizzle ORM, PostgreSQL, Vercel* — Nov 2025 – Jul 2026

- Partnered with school administrators to design and deploy a web application for managing requests and assignments across 400+ campus lockers
- Architected a PostgreSQL data model and type-safe SvelteKit server workflows using Drizzle ORM and Zod to manage locker inventory, requests, and assignments
- Replaced an email-and-spreadsheet workflow with a centralized system that processed 500+ student requests while improving data accuracy, reliability, and access control

Honors and Awards

FBLA Website Coding & Development | *California State Runner-Up & National Qualifier* — 2024

Technical Skills

Languages: Java, C++, Python, TypeScript, JavaScript, SQL
Frameworks: SvelteKit, React, Next.js, FastAPI, Flask, Tailwind CSS
Data & Infrastructure: PostgreSQL, Redis, RabbitMQ, Typesense, AWS S3, Cloudflare R2, NGINX
Developer Tools: Git, Node.js, Vercel, Google Cloud Platform
Design Tools: Figma, Photoshop, Illustrator
